

## Data sheet for calculating the carbon footprint of printing/writing paper based on the 10 toes of CEPI framework

<b>Company</b>	Holmen Paper
<b>Mill</b>	Braviken Paper Mill
<b>Reporter's name and email</b>	Leonard Dahlberg, leonard.dahlberg@holmen.com
<b>Paper quality</b>	Holmen INNR
<b>Period for validity of data</b>	2020

10 Toes of CEPI Framework	Fossil CO <sub>2</sub> (kg per tonne paper)	Biogenic CO <sub>2</sub> (kg per tonne paper)
1. Carbon sequestration in the forest		
2. Carbon stored in the product		-1604
Net sequestration of biomass carbon		
3. GHG emissions from pulp and paper production	18.5	
4. GHG emissions associated with producing virgin or recovered fibre	28.6	
5. GHG emissions associated with producing other raw materials	7.4	
6. GHG emissions associated with purchased or sold electricity and steam	18.5	
7. Transport-related GHG emissions	15.2	
8. GHG emissions attributable to product use (e.g. printing)		
9. GHG emissions attributable to end-of-life-management of products		
10. Avoided emissions		
<b>Total fossil CO<sub>2</sub> emissions</b>	<b>88</b>
